ABOUT

Hi! I'm Deeyan Vadwala, a passionate tech enthusiast with a love for coding and solving real-world problems using Python. I am currently pursuing a degree in Computer Science Engineering and have a keen interest in front-end development. I particularly enjoy working with CSS, HTML, and Python to create responsive and dynamic web experiences.

EDUCATION

Indus University

Bachelors of Technology Computer Science Engineering

Ahmedabad, Gujarat
October 2021 – June 2025

School Education,

St. Xavier's High School, Loyola Hall

HSC (12TH Standard) – 71.2%

SSC (10TH Standard) – 63.3%

Ahmedabad, Gujarat
May 2021
March 2019

SKILLS

Languages: Python, C++, JavaScript, MS office (Word, Power Point, Excel)

Frontend: HTML, CSS (Beginner)

Tools: Office 365, Visual Studio Code

Concepts: DSA, OOPS

Soft Skills: Fast Learner

PROFESSIONAL EXPERIENCE

Cyber Security Internship, Prodigy InfoTech

June 2024 – July 2024

- Developed a Python program implementing Caesar Cipher for text encryption and decryption.
- Created a program to manipulate image pixels for steganography, demonstrating techniques for embedding and extracting hidden messages within images.
- Built a password strength checker tool that evaluates password complexity based on various criteria and provides suggestions for improvement.
- Developed an educational keylogger to showcase how keylogging works and how it can be detected and prevented.
- Created a network packet analyzer tool using Python and Scapy to capture and analyze network traffic for suspicious activities.

AWS Cloud Computing Internship course, Indus University

June 2023 – June 2023

- **Skills Acquired:** Learned to deploy and manage cloud infrastructure using AWS services. Trained in configuring and monitoring EC2 instances, S3 buckets, and RDS databases. Educated on implementing security best practices, including IAM roles and VPC configurations. Taught to automate tasks using AWS Lambda. Gained experience in performance tuning and cost optimization for AWS resources.
- **Skills and Technologies:** AWS (EC2, S3, RDS, Lambda, IAM, VPC)
- **Achievements:** Improved infrastructure efficiency and security. Reduced operational costs through effective resource management.

CERTIFICATIONS

- 100 Days of Code: The Complete Python Pro Bootcamp
- Python And Flask Framework Complete Course for Beginners
- CSS, Bootstrap, JavaScript and PHP Stack Complete Course
- AWS Cloud Computing Internship
- Cyber Security Internship
- AWS Academy Graduate - AWS Academy Cloud Foundations
- AWS Academy Graduate - AWS Academy Machine Learning Foundations

PROJECTS

AgroRishi, Hackout '24, DA-IICT

Aug 2024 – Aug 2024

- Developed AgroRishi, a Flask-based platform integrating Bluetooth sensors to monitor and display real-time soil moisture, temperature, and humidity data.
- Deployed ML models for real-time crop health analysis, enhancing early disease detection and providing data-driven recommendations.
- Designed and implemented a multilingual chatbot using LLaMA 3 for personalized farming advice, pest management, and contextual support.
- Created a dynamic dashboard for visualizing sensor data and providing actionable insights, enhancing farm management efficiency.

Grind Anime

- Developed a responsive website for anime enthusiasts to search and watch anime shows.
- Responsibilities: Designed the user interface using HTML and CSS, implemented a search form integrated with an external search engine, Created a navigation menu and a contact information section.
- Technologies: HTML, CSS, JavaScript
- Outcome: Enhanced user experience with intuitive navigation and search functionality

PORTFOLIO

- Developed a personal portfolio using HTML, CSS, and JavaScript.
- Homepage: Includes sections such as About Me, Projects, Skills, Experience, Certificates, and Contact information.
- Responsive Design: Fully responsive layout compatible with both mobile and desktop devices.
- Interactive UI: Clean, intuitive interface with smooth transitions, social media icons, and a contact form.
- Contact Form: Collects emails and stores them in a .txt file for future communication.
- Downloadable Resume/CV: Option to download my CV directly from the site.
- Technologies: HTML5, CSS3, JavaScript, Font Awesome.
- Theme Support: Dark theme using style1.css and light theme using style.css.

Phoenix – Voice Controlled Virtual Assistant

- Designed and developed a virtual assistant capable of voice-based interaction, leveraging the speech_recognition library for speech-to-text processing.
- Technologies: Python, Flask, Speech Recognition, LangChain, Pytsx3, Web Scraping, LLM Integration (LLaMA 3)
- Integrated LangChain with the LLaMA 3 model for contextual and dynamic question-answering.
- Implemented functionalities for web browsing, email access, calculator, notepad, and system command execution via Python libraries like webbrowser and subprocess.
- Enhanced UX with weather updates via web scraping (requests and BeautifulSoup) and multi-platform search capabilities (Google, YouTube).
- Added robust speech output using pytsx3 for natural, engaging interactions.
- Developed custom modules for volume control and multi-step commands, showcasing modular and scalable design principles.
- Utilized prompts and chat templates to facilitate seamless AI integration, delivering personalized responses
